PROBlue modules

PROBlue UF

ULTRAFILTRATION MEMBRANES INSIDE

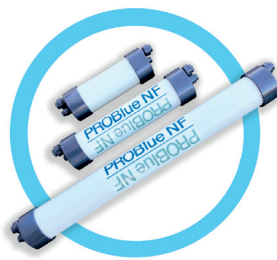

Suspended solids and bacteria removal
Ideal to produce drinking water

PROBlue NF

NANOFILTRATION MEMBRANES INSIDE

Low salinity water desalination
Ideal to produce drinking water

PROBlue RO

EXTRA LOW ENERGY BRACKISH WATER MEMBRANES INSIDE

Low salinity brackish water desalination
Ideal to produce industrial water and drinking water

ABSOLUTE QUALITY

The Everblue membranes are made in Europe using the best flat sheet and hollow fibre membranes available on the market to offer the highest performances.

The disposable PVC pressure vessels are made in Italy using the best quality raw materials made in Europe.

FAST INSTALLATION AND MAINTENANCE

ProBlue modules ensure an extremely fast and simple installation and maintenance.

EXCELLENT PERFORMANCE

High flow rate, precise salt rejection (RO and NF), perfect efficiency (UF) and low energy consumption are the main features of the PROBlue UF, PROBlue NF and PROBlue RO modules.

All the product data sheets and drawings are always available on our internet website
