

# FilterBlancMaxi

**Housings for filter cartridges**

**Model: FilterBlanc Maxi FBCM**

# FilterBlancMaxi housing and filtration cartridges

The market is now saturated with *standard*, poor quality filter cartridges of dubious origin, produced by companies with limited expertise and marketed to resellers, water treatment plant manufacturers and end-users at very low prices.

In particular, filter cartridges are marketed to retailers, installers, and end users at lower prices, which consistently take customers away from water treatment plant manufacturers by preventing them from getting a fair economic return from selling filter cartridges on their systems.

Everblue has been studying, designing and manufacturing housings filter cartridge and related filter elements in Italy since 2001 using top-quality European materials. High quality standards respected and guaranteed at all stages ensure innovative and reliable products.

**FilterBlancMaxi** housings and filter cartridges represent, technically and economically, the best solution available on the market for the construction of high flow filtration systems as pretreatment of reverse osmosis plants.

Their uniqueness represents a natural trade protection from the attacks of standard products and their undisputable quality always ensures better performance than any other alternative.

very high flow rate  
easy cartridge replacement

# FilterBlancMaxi housings

FilterBlancMaxi housings are produced in four different sizes:

**FilterBlancMaxi 12x20"**  
Contains 12 cartridges of 20"  
Flow rate up to 216 m<sup>3</sup>/h

**FilterBlancMaxi 21x20"**  
Contains 21 cartridges of 20"  
Flow rate up to 378 m<sup>3</sup>/h

**FilterBlancMaxi 39x20"**  
Contains 39 cartridges of 20"  
Flow rate up to 702 m<sup>3</sup>/h

**FilterBlancMaxi 57x20"**  
Contains 57 cartridges of 20"  
Flow rate up to 1026 m<sup>3</sup>/h

FilterBlancMaxi housings guarantee:

## High flow

*Big sizes enough to guarantee flow rates from 216 m<sup>3</sup>/h to 1026 m<sup>3</sup>/h, thanks to filtering elements of the highest quality*

## High pressure resistance

*Possibility to operate up to 6 bar*

## Absolute corrosion resistance

*Guarantee of duration in the filtration also of sea waters*

# Why choose FilterBlancMaxi?

## Uniqueness

FilterBlancMaxi housings are **unique** products because:

- They are the combination of the best technologies currently available on the market.
- They are made to be fitted 3 types of cartridges (depth, pleated and washable).

## Simplicity

FilterBlancMaxi housings are **easy** to use:

- A single operator opens and closes the **FilterBlancMaxi** container manually in a few minutes, thanks to the davit that ensures easy opening of the lid.
- The **FilterBlancMaxi** filter cartridges insert and pull out quickly by attaching quickly to each other thanks to the bayonet mount.

# FilterBlancMaxi filtration cartridges

FilterBlancMaxi filtration cartridges are made in three different version to meet all filtration requirements:

## Depth filtration cartridges

### N95BL

Polypropylene Melt Blown

High filter volume

High loading capacity of particles with heterogeneous size

## Pleated filtration cartridges

### PP95BL

Polypropylene Pleated

High filter surface

High loading capacity of particles with homogeneous size

## Washable filtration cartridges

### TPL95BL

Pleated Polyester Net  
TekBlue

Washable

High particle loading capacity with possibility of reuse

FilterBlancMaxi filtration cartridges guarantee:

### Long life

*The high filtering surface/volume allows a significant dirt holding capacity that is equivalent to a long service life and a consequent reduction in operating costs*

### High flow

*The large surface/volume allows high flow rates to be treated using filter housings and batteries having small footprints*

### High efficiency

*The high particle removal efficiency of the filter septa enables the production of quality water for all usage needs*

# FilterBlancMaxi N95BL depth filtration cartridges

Depth filtration cartridges

**N95BL**  
Polypropylene Melt Blown

**double gradient**

High filter volume  
High loading capacity of particles with heterogeneous size

The **FilterBlancMaxi N95BL** cartridges are made of extruded polypropylene with internal support and rigid molded polypropylene terminals.

The **FilterBlancMaxi N95BL** cartridges guarantee very high load capacity thanks to the **double gradient** double filtering layer.

The first layer accumulates the coarsest particles while the second layer performs the final finishing by retaining the smaller particles.

These cartridges are ideal for treating non-refined water with high presence of suspended solids (up to a maximum of 1 ppm TSS) with heterogeneous particle distribution.

**FilterBlancMaxi N95BL** cartridges are produced in the following filtration grades: 1-10  $\mu$ , 5-20  $\mu$ , 20-50  $\mu$ , 50-90  $\mu$  with 95% removal efficiency (99.98% absolute on request).

# FilterBlancMaxi PP95BL pleated filtration cartridges

**Pleated filtration cartridges**

**PP95BL**  
*Polypropylene Pleated*

**5 Layers**

*High filter surface*

*High loading capacity of particles with homogeneous size*

**FilterBlancMaxi PP95BL** cartridges consist of: 3-layer polypropylene filtering septum supported by an external PP drainage net and an internal PP drainage net (**5 Layers** filtering system); internal support and moulded rigid polypropylene terminals. The external drainage net of the **5 Layers** filter system prevents the crease from closing due to the increase in pressure due to the dirty filter material, always ensuring the constant outflow of filtered water towards the internal support of the cartridge.

**FilterBlancMaxi PP95BL** cartridges, thanks to the special filter system **5 Layers**, guarantee a longer life compared to the normal filter cartridges on the market having the same surface. These cartridges are ideal for the final finishing of water containing homogeneous particle sizes (up to a maximum of 1 ppm TSS).

**FilterBlancMaxi PP95BL** cartridges are produced in the following filtration grades: 1, 5, 10, 20, 50  $\mu$  with 95% removal efficiency (99.98% absolute on request).

# FilterBlancMaxi TPL95BL washable filtration cartridges

Washable filtration cartridges

**TPL95BL**  
Pleated Polyester Net  
TekBlue

**500 CLEANING GUARANTEED**

**filstar**  
inside  
**PATENTED**

Washable

High particle loading capacity with possibility of reuse

Rigid polypropylene structure  
**filstar** inside  
**PATENTED**

The **FilterBlancMaxi TPL95BL** cartridges consist of: moulded rigid internal support, moulded rigid polypropylene terminals and **TekBlue** pleated polyester mesh filtering panel coupled to a PP drainage net. The two nets are always kept perfectly open and in place by a special rigid polypropylene structure: the system **filstar** inside

The system **filstar** inside prevents the closing of the fold due to the increase in pressure as a result of the dirty filter material, always ensuring the constant outflow of filtered water to the inside of the cartridge. Also the rigidity of the folds guaranteed by system **filstar** inside allows easy and effective washability even with low pressure water jets (suggested pressure 2 bar – max 3 bar).

**FilterBlancMaxi TPL95BL** cartridges, with patented system **filstar** inside and **TekBlue** filter net, **are guaranteed to be washed at least 500 times**, thus allowing a very high cost savings.

These cartridges are ideal for the filtration of water that has a high presence of suspended solids (up to a maximum of 1 ppm TSS) with a heterogeneous distribution of particles.

**FilterBlancMaxi TPL95BL** cartridges are produced in the following filtration grades: 20, 50 µ with 95% removal efficiency.
