

TPL95MX washable filtration cartridges

Washable filtration cartridges

TPL95MX
Pleated Polyester Net
TekBlue

500 CLEANING GUARANTEED

Washable

High particle loading capacity with possibility of reuse

Rigid polypropylene structure
filstar inside
PATENTED

The **TPL95MX** cartridges consist of: moulded rigid internal support, moulded rigid polypropylene terminals and **TekBlue** pleated polyester mesh filtering panel coupled to a PP drainage net. The two nets are always kept perfectly open and in place by a special rigid polypropylene structure: the system **filstar** inside

The system **filstar** inside prevents the closing of the fold due to the increase in pressure as a result of the dirty filter material, always ensuring the constant outflow of filtered water to the inside of the cartridge. Also the rigidity of the folds guaranteed by system **filstar** inside allows easy and effective washability even with low pressure water jets (suggested pressure 2 bar – max 3 bar).

TPL95MX cartridges, with patented system **filstar** inside and **TekBlue** filter net, **are guaranteed to be washed at least 500 times**, thus allowing a very high cost savings.

These cartridges are ideal for the filtration of water that has a high presence of suspended solids (up to a maximum of 1 ppm TSS) with a heterogeneous distribution of particles.

TPL95MX cartridges are produced in the following filtration grades: 20, 50 μ with 95% removal efficiency.
