OBJECT: REPLACEMENT THE GASKET FOR FILTER CARTRIDGES “BL”

Everblue is pleased to inform all customers that, starting next month, all the cartridges N95BL200, PP95BL5L200, TPL95BLF200 will be produced with the silicone O’ring.

The O-ring used in the past was made of nitrile butadiene rubber or simply NBR.
This change was wanted by Everblue’s technical office, as the silicone allows the use of its cartridges both in the field of potable waters and in the field of industrial waters; moreover silicone is the most used material in the food and beverage sector.

This change will not affect at all the price of a single cartridge, which will remain unchanged.

We remind you that N95BL200, PP95BL5L200, TPL95BLF200 cartridges are used in FilterBlue, FilterBlanc and FilterBlack containers.

Everblue is always looking for the improvement of its products and we are sure that you will appreciate our continuous efforts to offer you a better service.

For any type of clarification and/or additional information you can refer to your sales representative or contact us at +39-0525-920108 or info@everblue.it
