

Dear customer,

Everblue has immediately implemented the security measures requested by our Government to contain the infection and the effect of the COVID-19 pandemic.

We want to assure you that, with total respect of security and prevention measures to guarantee the well-being of our co-workers and employees, we will keep offering the same services, same quality and same availability as always.

We can assure you that the delivery of our products is proceeding regularly.

The vast stock of goods in our warehouse allows us to satisfy both urgent and long-term requirements.

The supply of raw materials, only of European community origin as always, proceeds regularly.

Our sales people and technicians are regularly working; thanks to smart working they are able to work from home and satisfy all your needs.

None of your requests will be ignored.

No deadline is or will be at risk.

No project will be suspended.

We are perfectly equipped for technical or commercial conference call meetings to support you at all times.

The ability to schedule, even in these complicated days, will guarantee continuity and renovation.

It's a tough moment for all of us, but we will never abandon, not even for a second, the desire to fight for our future.

As we hope that the emergency will soon come to an end, we take this opportunity to send you our best regards.

Everblue S.r.l.
