## **OBJECT: Model variation from N85BHF to N95BHF**

---

Everblue is pleased to inform all costumers that N85BHF cartridges have been replaced with the new model N95BHF (polypropylene melt blown cartridge)

Our technical department decided, after careful analysis, to introduce this new model cartridges the following performance:

- better efficiency, 95% for every filtration degree
- better duration, an improvement from 10% to 20% to a single cartridge life time
- better mechanical strength, thanks to the internal polypropylene support

We also have optimized the production cycle and we reduced the external diameter at 100mm, instead of 112mm; this allowed us to maintain a price in line with the previous one: for the 9"3/4 there's a difference of 1.73 € while for the 20" the difference is 3.42 €.

You will find attached the price list on which you can apply the discount reserved for you.

The packages also have been modified: cartridges now are packed in boxes of 24 pieces for the model of 9"3/4 (instead of 12 pieces) and 12 pieces for the new model of 20" (instead of 6 pieces).

Everblue is always looking for the improvement of its products and we are sure that you will appreciate our continuous efforts to offer you a better service.

For any type of clarification and/or additional information you can refer to your sales representative or contact us at +39-0525-920108 or [info@everblue.it](mailto:info@everblue.it)
