

**DEAR CLIENTS**

**OBJECT: N95BHF Internal Support Change**

With this letter Everblue is pleased to inform all his clients that after many in-depth studies by our Technical department, we decided to replace the internal printed support on the N95BHF cartridges with a rigid internal support created during the cartridge's production phase.

This change allows us to improve the production process while maintaining the flowrate performances and efficiency of the cartridge; moreover, all the tests concerning mechanical resistance have assured high-quality standards.

We would also like to inform you that the packaging and price of the cartridges haven't changed.
