

# Ionpure® LX-X High Purity Continuous Electrodeionization(CEDI) Modules

## Ionpure® LX Module – LX-X

The Ionpure® LX-X industrial modules produce high purity water through electrodeionization for a wide range of industrial applications. LX-X modules consistently deliver maximum reliability and superior performance for power, HPI/CPI, general electronics, food and beverage and laboratory applications without regeneration downtime.

## LX-X Series Features

- Generates mixed-bed quality deionized water without the use of chemicals
- Significantly lower operating costs, than conventional ion exchange
- No need for acid / caustic, neutralization system or exchangeable DI tanks
- Double O-ring seal guarantees leak-free operation
- Continuous production instead of batch, with consistent quality
- Superior electrical isolation
- Proprietary "all filled" concentrating compartments eliminate recirculation pump and brine injection
- Continuous operation
- Wetted materials of construction comply with NSF61
