

Chemical products

EVERBLUE 100A

Antiscalants for reverse osmosis plants

APPLICATIONS

Reverse osmosis equipment protection against scales and iron deposits.

ADVANTAGES

EVERBLUE 100 A is a product intended to prevent pollution of reverse osmosis and microfiltration plants fed with raw water

- Extremely effective on different types of water.
- Can be used both for industrial plants and for drinking water systems
- Product compliant with UNI EN 15040 "Chemical products used for the treatment of water intended for human consumption, antiscalant products for membranes"
- Minimizes dirt and therefore reduces the frequency of membrane cleaning.
- Totally or partially replaces acidification.
- Compatible with all types of membranes.
- Liquid presentation that simplifies its implementation

USE

Method: injection by means of a metering pump of the pure product (directly from his packaging) or diluted.

Dosage: depending on the concentration of the encrusting salts and the iron, it may indicatively vary from 0.5 to 6 cm³ / m³ of feed water.

USE REGULATIONS

Handling: see safety data sheet. Adopt the main cautions concerning chemical products handling.

Preservation: keep inside the original packing, in a fresh room, away from excessive cold and heat. The shelf life of Everblue 100 has been assessed at 1 year.

The information contained in this document is based on our present knowledge and must not be considered as a guarantee of specific properties.

TECHNICAL FEATURES:

Formulation	Special phosphonates
Aspect	Straw coloured liquid
pH sol. 1%	7,5 +- 1,0
Density a 20°	1,32 - 1,34 g/cm ³
Freezing temperature	< -5° C
Solubility	Complete
Packaging	Kg
Class ADR/RID/IMDG/IATA	Non hazardous for transport

Packaging and prices
